

BEAMCITE

What the \$49 research add-on actually gets you

To put it simply: we get you recommended by AI, and this is the research that makes it happen.

✓ **Competitor research:** We find who AI recommends instead of you right now.

✓ **Backlink research:** We list the sites that should be mentioning you.

✓ **Content gaps:** Questions your competitors get cited for and you don't cover yet. This is usually the fastest win.

✓ **Keyword demand:** What your buyers actually ask, with real numbers, so nothing gets written on a guess.

✓ **AI visibility report:** We ask ChatGPT, Perplexity, and Gemini the questions your buyers actually ask.

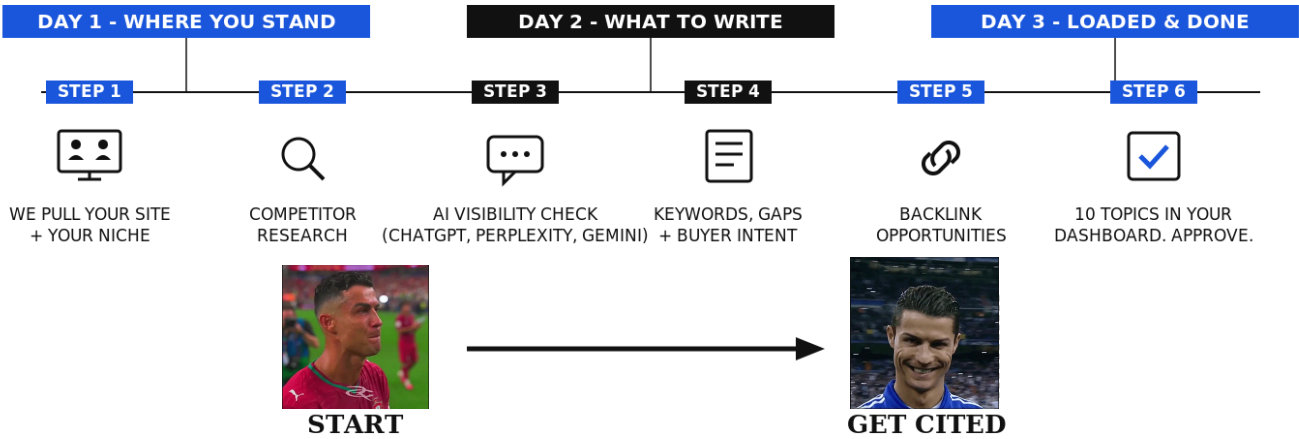

✓ **10 topics, in your account:** We turn all of it into your first 10 topics and load them into your dashboard, in order.

Tap any underlined item to open a real 10-row sample.

When it all happens

3-DAY RESEARCH PROCESS

■ DONE-FOR-YOU, ALL OF IT

DELIVERABLES & SUPPORT
